ELON® Smart

A new way to monitor and control your water heating in real-time

Add warmth to life.

ELON Smart Water App

Standard Electric Water Heater
Kwikot Superline 600 DUAL 150L
DSG-150

The Elon Smart Water delivers actionable data by means of real-time monitoring and communication. This provides ecosystem stakeholders with the necessary insights to support decision-making and proactive management and service delivery.

Plug-and-play solar PV enables reduced reliability on fossil fuels, improving quality of life.

Features

- A geyser that is smart, connected and plug-and-play solar PV-ready.
- Simple installation and automatic self-test to ensure correct installation.
- Easy retrofit - replaces standard thermostat to make existing electric geysers smart.
- Solutions from controller alone through to turnkey systems.
- Inventory available in all major centres, including geysers and solar PV kits.
- Single point of responsibility and accountability for full water heating solution.
- End-to-end support across product lifecycle.
- Expert advice across the solution and value chain.

Benefits

Installers

- Easier and faster installation (no unit that needs to be separately mounted and no wiring that needs to be done between the Elon Smart unit and the water heater). Can also come pre-installed with the water heater.
- Full installation self-check tells installer if everything is installed and functioning correctly before they leave the premises.

Households / users

- Full smart geyser functionality - water temperature, solar and grid energy use information and the ability to change settings (including separate set point temperatures for solar PV and grid) via an app on their iPhone or Android smartphone.
- Early alerts / alarms about (e.g.) insulation failure, element failure, component failure and other faults.
