ANDROID

**Scan QR code to install the Elon Smart app on your phone:**

IPHONE

Quick Start

- **Download the App**
  - Get the Elon Smart app from the **Apple App Store** (iPhone) or **Google Play Store** (Android).
- **Open the App**
  - Launch the app on your phone.
- **Add Your Geyser**
  - Tap the + button in the app.
  - Scan the Elon Smart **QR code** inside your DB board.
  - → Your geyser will now appear in the app.
- **View Your Geyser Info**
  - Tap your geyser in the app to see:
    - Current water temperature
    - Solar and grid energy use
    - Temperature set points

Access the Thermostat Settings:

- In the app, tap the Settings (⚙) button next to your Elon Smart device.
- The app will ask to connect to the thermostat's built-in Wi-Fi hotspot → Tap "CONNECT."
- After connecting, the Thermostat Settings screen will open.

Set Up Wi-Fi for the Thermostat:

- Tap "Wi-Fi Hotspot." The app will search and display nearby Wi-Fi networks.
- Select the Wi-Fi network you want the thermostat to use.
- Enter the Wi-Fi password.
- Tap "Test Connection."

Check for a Successful Connection:

- If the password is correct, the app will return to the Thermostat Settings screen.
- Your chosen Wi-Fi network will now be shown with a green Wi-Fi icon → this means the thermostat is successfully connected to the internet.

Setting Temperatures & Heating Schedules:

Access the Thermostat Settings:

- In the app, tap the **Settings** (⚙) button next to your Elon Smart device.
- The app will ask to connect to the thermostat's built-in Wi-Fi hotspot → Tap "**CONNECT**."
- After connecting, the **Thermostat Settings** screen will open.

Set Your Temperatures:

- Enter your preferred temperatures for:
  - **Target Solar Temperature** (heats with solar power)
  - **Target Grid Temperature** (heats with mains electricity)

Recommended settings:

- Solar: **65 °C**
- Grid: **50 °C**

(This helps you save electricity by making solar do most of the work.)

Choose a Heating Profile:

- Select how your household uses hot water.
- → A good starting point is "**Morning and Evening Shower**."

Save Your Settings:

- Tap **Save**. The app will return to the main settings screen with your updated values.
